

stable, lasting value, sustainable, transparent

the WP 50 cold door and partition wall system

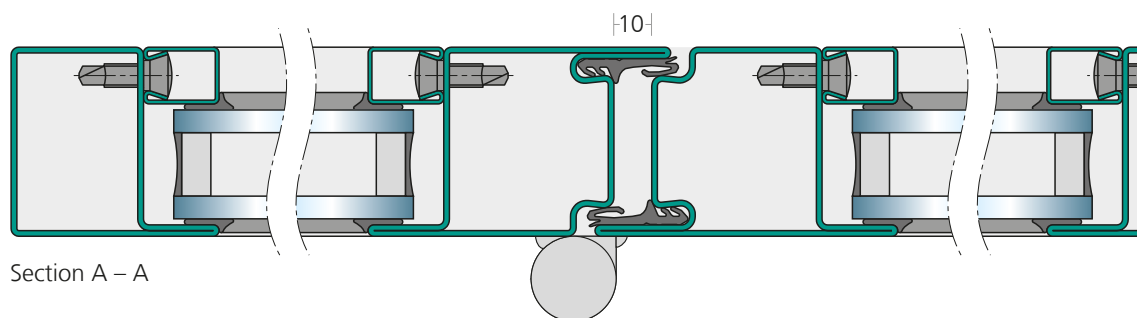

The WP 50 cold door system

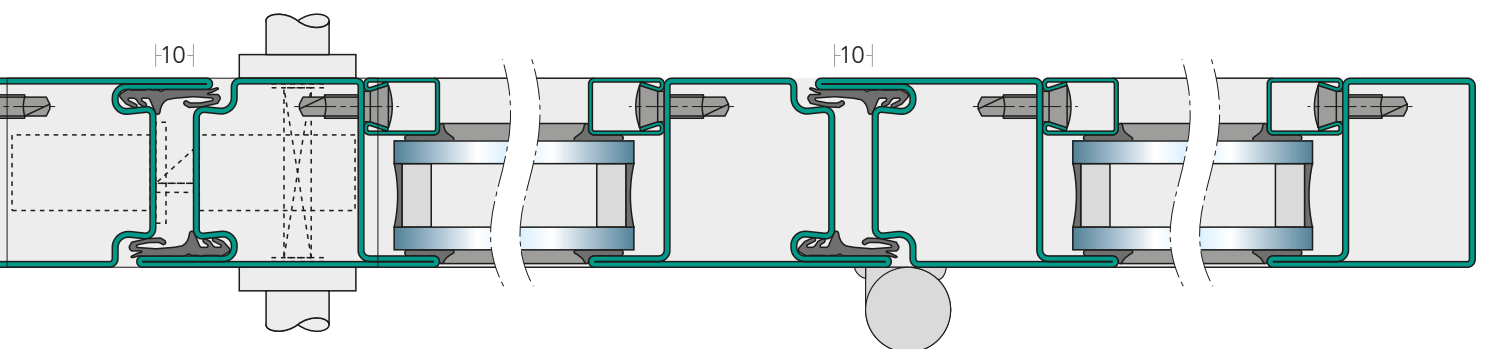

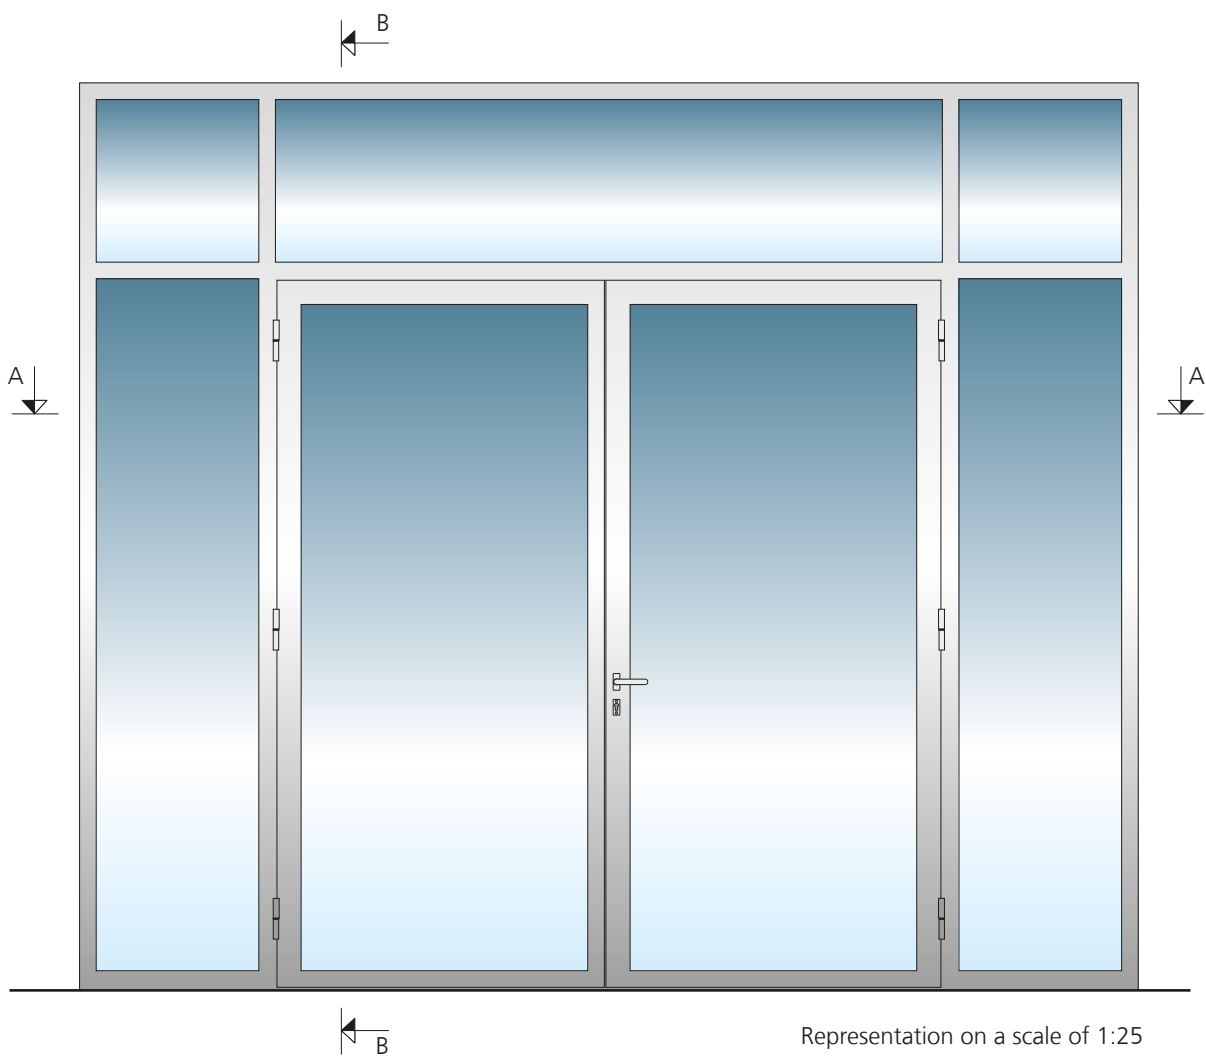

- WP 50 cold offers a wide range of applications and high functionality
- The narrow face widths allow for transparent door elements in an attractive design
- Flush 1- and 2-leaf door constructions or fixed glazing can be realized in different dimensions
- WP 50 cold offers consistent stability even for large door elements and the security of a permanent fit for the door hinges
- The material steel is particularly impact-resistant, highly resistant, dimensionally stable and extraordinarily durable.
- Steel is 100% recyclable and particularly environmentally friendly
- Steel offers more security against burglary and vandalism than any other material
- With the clipped glazing bead system and coordinated gaskets, various glass thicknesses are possible
- WP 50 cold profiles and glazing beads are supplied in a processing-friendly length of 6600 mm.
- The steel profiles are supplied with either a bright or strip galvanized surface.
- WP 50 cold is tested according to EN 14531-1.
